

Media Compatibility Information

The following is a chart of common media with recommended O-Ring compounds that can be used with the Polyimide and Elastomer diaphragms used in Neo-Dyn® pressure switches except as noted.

NOTE: The information given on this chart is typical performance data for "Kapton" Type H and Type F films; it is not intended to

be used as design data. We believe this Information is the best currently available on the subject. It is offered as a possible helpful suggestion in experimentation you may care to undertake along these lines. It is subject to revision as additional knowledge and experience are gained. Neo-Dyn® makes no guarantee of results and assumes no obligation or liability whatsoever in connection with this information.

"The use of ITT Industrial Controls pressure, temperature and flow switches must be in accordance with the provisions of the National Electric Code, U.L. and/or other local, military or industry standards that are pertinent to the particular end use. Installation or use not in accordance with these codes and standards

could be hazardous to personnel and/or equipment."

Note: It is buyer's responsibility to determine the suitability of the Neo-Dyn[®] switch for its application. ITT Industrial Controls makes no warranties and assumes no liability as to the suitability or sufficiency for buyer's application of the switch.
